

TLILIC2005A - LICENCE TO OPERATE A BOOM-TYPE ELEVATING WORK PLATFORM

COURSE OVERVIEW

This course covers the outcomes required to operate a boom-type elevating work platform (boom length 11 metres or more) for licensing purposes, and involves the operation of a telescoping device, hinged device, or articulated device or any combination of these used to support a platform on which personnel, equipment and materials may be elevated to perform work. The 11 metre boom length shall be taken to mean the greater of the following:

- (a) The vertical distance from the floor of the platform to the surface supporting the elevating work platform with the platform at its maximum height; or
- (b) The nominal reach, measured horizontally from the centre point of rotation to the outer edge of the platform in its most extended position.

TARGET AUDIENCE

Any person who is required to undertake boom typed elevating work platform operations as part of their duties

DURATION

One full day. Meals, refreshments and all course material supplied 7.30am-4.30pm

CONTENT

- Plan Work
- Risk Management
- Picking the right EWP for the job
- Working load Limit/Safe Working Load
- Emergency Procedures
- Report all Incidents
- Shut Down EWP

LEARNING OUTCOMES

- Appropriate mathematical procedures for estimation of loads
- Commonwealth, state or territory OH&S legislation, standards and codes of practice
- Ability to read and comprehend manufacturer's instructions, procedures and safety signs
- Understanding of elevating work platform operations and operating techniques
- Emergency procedures and safety equipment
- Understanding of organisational and workplace standards, requirements, policies and procedures for conducting elevating work platform operations
- Understanding of the hierarchy of hazard identification and control
- Procedures for the recording, reporting and maintenance of workplace records
- Typical routine problems encountered in the process and with equipment and adjustments required for correction
- Complete the positioning, stabilising, set up of elevating work platforms, including the use of outriggers/stabilisers and packing

- Operate mobile elevating work platform using best mobile practice
- Use communication skills at a level sufficient to communicate with other site personnel
- Operate and control an elevating work platform including all functions to their maximum extension within the safe working (rated) capacity
- Apply risk assessment and hazard control strategies-
- Identify problems and equipment faults

CERTIFICATION

A statement of attainment will be given to each student.

ENROLMENT

To enrol, please contact 08 9091 5407 or email allminetraining@bigpond.com

Other dates available on request for bulk training
